k. *Description of Request:* The licensee requests approval to temporarily remove its ramping rate requirements under Article 33(d) to perform low level outlet gate testing at North Battle Creek Dam during the months with no minimum flow requirement (November–March). The licensee is required by the California Division of Safety of Dams (DSOD) to conduct the testing annually and in the presence of DSOD every three years. Temporary removal of its ramping rate requirements would allow the licensee to perform the testing in a significantly shorter amount of time than with ramping rate requirements in place. Accordingly, the licensee is requesting the temporary ramping rate variance from November 1, 2022 through March 31, 2023 to allow sufficient time and flexibility for scheduling and conducting the test. The gate full travel test will result in approximately 40 cubic feet per second entering North Fork Battle Creek and remain in the creek until it reaches Macumber Reservoir. No species of special concern are located in the reach directly below North Battle Creek Dam that would be affected by the testing.
